Fish and Wildlife Management Concentration
at American Public University (APU)

The environmental degree programs at APU offer a Fish and Wildlife Management concentration which is designed to help prepare students for many rewarding careers, from Park Ranger to Environmental Scientist, Ecologist to Fisheries and Wildlife Biologist. Students will address environmental science, policy, analysis, and management issues relating to fisheries and wildlife management, stewardship of natural resources, conservation biology, and restoration ecology.

APU online degree programs are set apart from others in the industry as our professors hold leadership positions at the U.S. Fish and Wildlife Service, Environmental Protection Agency, Bureau of Land Management, The Nature Conservancy, and other organizations. APU students learn from professionals working in the careers they aspire to work in, therefore gaining a competitive advantage to pursue a wide range of career options.
