Transportation and Logistics Management (TLM) Programs at American Public University (APU)

These programs provide students with the foundational knowledge that supports global air, maritime, and intermodal logistics and transportation systems. Our students will learn cutting edge processes and the applicability of global standards in public and private sector transportation and logistics management. The convergence of multiple disciplines including information technology, emergency and disaster management, homeland security, and more lead to multiple career options for students completing any of the following programs:

TRANSPORTATION LOGISTICS MANAGEMENT - ASTL approved (part of the PLS Waiver School Program)

Bachelor of Arts in Transportation and Logistics Management: 121 semester hours (40 courses)
In addition to a general concentration, concentrations are offered in:

- Air Cargo
- Reverse Logistics Management

Master of Arts in Transportation and Logistics Management: 36 semester hours (12 courses)
In an addition to a general concentration, concentrations are offered in:

- Maritime Engineering Management
- Reverse Logistics Management
